

ONYRO

RESTO

ONYRO is a robot serving drinks at the table without any help

Driven by waiters, he helps them during service and table clearing

STAFF CAN USE HIM EASILY

A waiter calls ONYRO by raising his arm while looking in his direction;

ONYRO detects this gesture and heads towards him;

The waiter chooses drinks and a table number on the robot screen and can carry out other tasks;

ONYRO goes to his corner where he uses dedicated utensils (refrigerator, glasses, straws, etc.) or to the bar according to the order;

ONYRO prepares the order and goes to the customer table;

ONYRO says a polite sentence and places the drinks directly on the customer table.

SALES MANAGEMENT

The owner uses an integrated application to keep track of table consumption.

Once the bill is paid, he deletes the data.

AUTONOMOUS

ONYRO is entirely self-managed:

Autonomous Service, Recharge, Decisions.

8-hour operating time without recharge.

UNIQUE IN THE WORLD

ONYRO is the very first robot of this type.

Multi-awarded, he is the fruit of the French company ipsum tek.

Based upon a unique concept: ONYRO uses its own utensils (glasses, fridge, etc.)

EVOLUTIONARY

Software upgrades will enable other functions such as:

- Independent service of more products (bread, cutlery, dishes, etc.)
- Calling customer by raising the arm and taking verbal orders
- Table settings
- Regular rounds of attention
- etc.

PROFITS

One or more ONYRO robots can take care of almost the entire beverage service in a restaurant:
From soda to cocktail to glass of wine.

PROFITABILITY

- An extra who works 24/7 without any days off
- Increase the turnover thanks to the attractiveness effect
- Low cost

ATTRACTION FOR CUSTOMERS

- Image of modernity
- Expectations of the new generation customers
- Free advertising by Media

MORE EFFICIENT STAFF

- The robot carries out tasks of little added value
- 24/7 availability
- Table clearing: Brings dishes back to the kitchen

PRICES

(EXCLUDING TAX)

RENTAL

Down payment of €6,000 then €990/month

Included in the price:

Shipping

Installation / Training

Support / Maintenance

Minimum contract: 1 year

Software update: additional cost of €150 / month

SPECIFICATIONS

- 540mm (D) x 1450mm (H). 60Kg
- Maximum speed 0.8m/s
- Autonomy: 8H / Charge 2H
- Anti-tilt staircase
- Automatic return to charging station
- Quiet operation
- Works in areas without wifi
- Installation duration: one day

FUNCTIONS

AUTONOMOUS SERVICE

ONYRO serves traditional drinks (sodas, beers, etc.), wines and champagnes to the customer's table.

COLLABORATIVE MODE

In tandem with the bar, ONYRO serves percolator coffees, draft beers and cocktails.

TABLES CLEARING

The staff puts dirty plates and glasses on a dedicated tray and sends the robot to the kitchen.

Note 1: All these modes are configurable

Note 2: Acting in fleet of robots, each one can be assigned to a specific mode
